Glassmaster

Spanish Ice

Now your dreams Can become reality...

The creation of stunning, decorative glue-chip glass for doors and toplights is now affordable and available from UAP, the manufacturers of the Spanish Ice™ designer glass collection.

Each design in this brochure has been carefully developed to perfectly blend the various techniques required to produce stunning glass effects. The Spanish Ice™ process produces random backgrounds that makes every single piece of glass totally individual and unique.

The Spanish Ice™ Collection can be produced in any size to fit any door or toplight size. Naturally we can also produce designs to customers own requirements, be it for a single unit, or for a full range of doors. We can also blend the Spanish Ice™ concept with soft sandblast backgrounds and coloured films or bevels to produce an endless array of patterns that is only limited by ones imagination.

Being a UAP product, Spanish Ice™, is carefully Quality Controlled, and every piece of glass is inspected before it is despatched to make sure that it will reach our customers in perfect condition every time.

For ease Spanish Ice™ can be supplied as single panes of glass, or complete as sealed units in almost any thickness and with any backing glass, although we do strongly suggest that plain glass is used to maximise the stunning glass effect.
